

Technical Service Engineer

Thiele Kaolin Company, a major producer of coating and filler clays, is seeking a Technical Service Engineer. This position is located in Sandersville, Georgia at company headquarters.

The primary responsibility of the position is to provide worldwide customers with technical assistance in the application of our kaolin products. The candidate will travel globally to audit customer processes, deliver technical presentations and to address product application inquiries. The candidate is a key liaison between customers, end users and our technical resources.

Successful candidates will possess:

- * Bachelor's degree in a technical or engineering discipline.
- * Five or more years of experience in the kaolin industry or with paper coating applications.
- * Proficiency with Microsoft Office programs including PowerPoint, Excel and Word.
- * The ability to travel globally to support technical and sales efforts.

Please send resumes and salary history via e-mail to:
